IT PAYS TO DELIVER QUALITY CARE

Pathologists Quality Registry

Powered by

“Preserving the value of pathology and simplifying regulatory compliance for pathologists has been the CAP’s relentless pursuit. Approval of the Pathologists Quality Registry by CMS as a Qualified Clinical Data Registry, is a significant achievement for CAP members and patients.”

– Emily E. Volk, MD, MBA, FCAP

Protecting Your Future

We believe that getting paid fairly for the value your practice provides is essential to the future of providing outstanding patient care. That's why we created the Pathologists Quality Registry.

Developed by pathologists for pathologists, the Pathologists Quality Registry offers more pathology-specific quality measures to better represent the care you provide when complying with the Centers for Medicare and Medicaid Services' (CMS) Merit-based Incentive Based System (MIPS). So you spend less time worrying about compliance and more time practicing.

Smart.

Pathologists Quality Registry

Powered by FIGmd*, a leading provider of clinical data registries, the Pathologists Quality Registry is the only qualified clinical data registry approved by CMS to include additional QCDR measures specific to pathology.

Position Your Practice Optimally to Get Paid

Unlike claims-based reporting, the Pathologists Quality Registry features:

- **More pathology-relevant quality measures** than any other reporting solution, including exclusive registry-specific quality measures, so you can report on measures most relevant to the care you provide
- **Data submission on all patients applicable to each measure**, *not only those who are Medicare beneficiaries*
- **The potential to earn additional points** in MIPS by using the registry as your reporting methodology
- **The ability to attest to other categories** in MIPS, like Improvement Activities, saving you time by consolidating your reporting activities into a single submission platform

Simplify Reporting with a Robust Platform

Designed for pathologists and practice managers, the Pathologists Quality Registry offers:

- Comprehensive registry dashboards, with a user-friendly interface and complete views of your performance in MIPS
- Optimal reporting recommendations based on your practice data that maximize your bonus potential
- Provider- and practice-level benchmark reports to help you better understand how to enhance your practice performance and improve patient care
- Flexible reporting options to meet any practice need ranging from web-based data entry to automated data extraction

“The Pathologists Quality Registry is a performance improvement tool with **benchmarking to enhance patient care and practice performance.**”

– Jonathan L. Myles, MD, FCAP

Gain confidence in reporting with access to more measures*, and report all relevant patients to ensure you are compensated fairly for the role you play in improving patient care. **Here's how.**

Report.

The Pathologists Quality Registry features all eight CMS-approved, pathology-specific quality measures:

- Breast Cancer Resection Pathology Reporting
- Colorectal Cancer Resection Pathology Reporting
- Barrett Esophagus Pathology Reporting
- Radical Prostatectomy Pathology Reporting
- Evaluation of HER2 for Breast Cancer Patients
- Lung Cancer Reporting (biopsy/cytology specimens)
- Lung Cancer Reporting (resection specimens)
- Melanoma Reporting

Plus, six CMS-approved quality measures exclusive to the Pathologists Quality Registry:

- Turnaround time (TAT) for standard biopsies
- Endometrium Cancer Protocol Elements
- Kidney Cancer Resection Protocol Elements
- Intrahepatic Bile Duct Cancer Protocol Elements
- Liver Resection Cancer Protocol Elements
- Pancreas Resection Cancer Protocol Elements

* Measures reviewed on an annual basis by CMS and subject to change

Monitor.

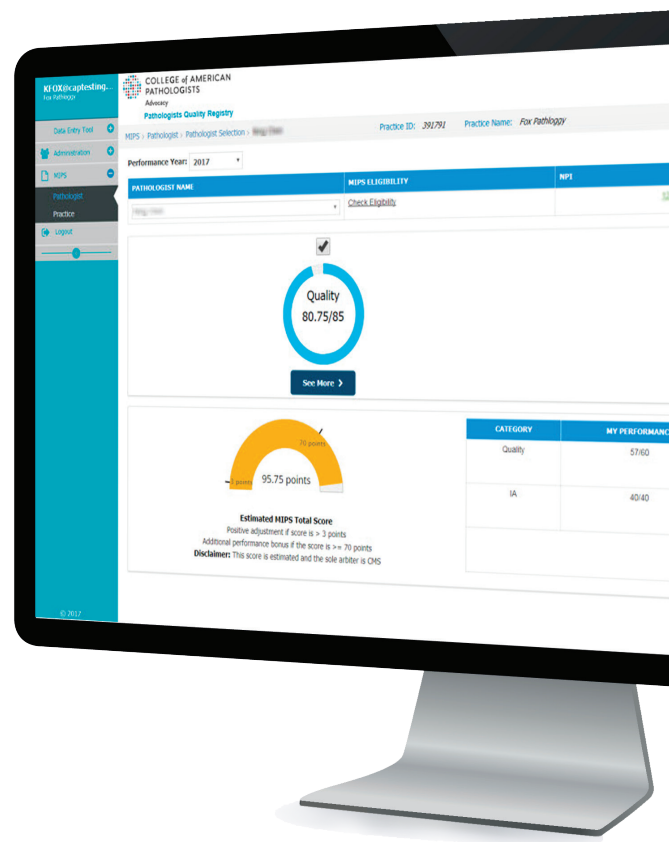

More control of your MIPS performance

Knowing where your practice's performance stands is effortless via dashboards. Whether you're an individual pathologist or the practice manager in charge of group reporting, the Pathologists Quality Registry provides a comprehensive view of your practice's performance before submitting to CMS. So you know where you stand compared to other practices all throughout the year.

Benchmark.

Enhance patient care through understanding your MIPS performance

Benchmark your performance and identify opportunities to enhance patient care with quarterly benchmark reports. And overall, gain a better understanding of how your practice performs compared to others, either as a whole or in a specific area within a practice.

Are you ready to get paid to deliver quality care?
